Propane BBQ Instructions

- ❑ **To light the barbecue**
 - ❑ **Ensure the lid is open and all valves are turned off. Failure to follow this instruction can result in serious injury.**
 - ❑ **SLOWLY**, open the valve on the propane tank. This step is **EXTREMELY IMPORTANT!!!** If you open the valve too quickly air can become locked in the regulator and you will not get full heat from the barbecue.
 - ❑ **Light** as you would a normal propane barbecue.
 - ❑ **If you are only getting 1/2 heat. Turn barbecue off and then turn propane tank off. VERY SLOWLY**, turn open the valve on the propane tank and re-light.
